

# Southwest Calgary Ring Road

## Construction Advisory

October 11, 2017

---

### **24-Hour Earthworks from 90 Avenue to Elbow River**

**Activity and Location:** KGL Constructors will be carrying out temporary, 24-hour earthworks operations in the Transportation Utility Corridor from an area near 90 Avenue S.W. to the Elbow River valley. This will involve haul trucks and earthmoving equipment active in the area 24-hours a day until mid-December 2017. To minimize the impact of this work on neighbouring residential areas and wildlife, KGL will implement the following:

- Site lighting will be aimed away from residential areas
- Operations will be designed to avoid having vehicles back up
- Noise abatement will be placed around generators to reduce noise
- Activity has been planned to avoid key wildlife periods
- Wildlife passage will be provided and monitored
- Only earthworks operations will be undertaken during night shifts
- Dust will be monitored and mitigation measures applied

**Scheduled Implementation Date:** Wednesday, October 11, 2017 (first night shift)

**Scheduled Completion Date:** Friday, December 14, 2017 (last night shift)

**Hours of Work:** 24 hours a day until the completion date

KGL would like to thank you for your patience during this period of construction.
