Construction Advisory

September 29, 2017

Stripping Area near North Gravel Site

Activity and Location: KGL Constructors will start stripping topsoil at the south end of the gravel site to place stockpiles. This area was included as part of the original operating plan for the gravel site and the stripping work was deferred until the fall of 2017. All other conditions related to gravel operation will remain unchanged, including limited work hours, dust mitigation activities, and ongoing noise and dust monitoring.

Stripping of the stockpile area is expected to take about a week to complete. Equipment will temporarily be working closer to homes and noise is expected to be elevated during this time. The stockpile area is expected to be active over the life of the north gravel site.

Start Date: October 2, 2017

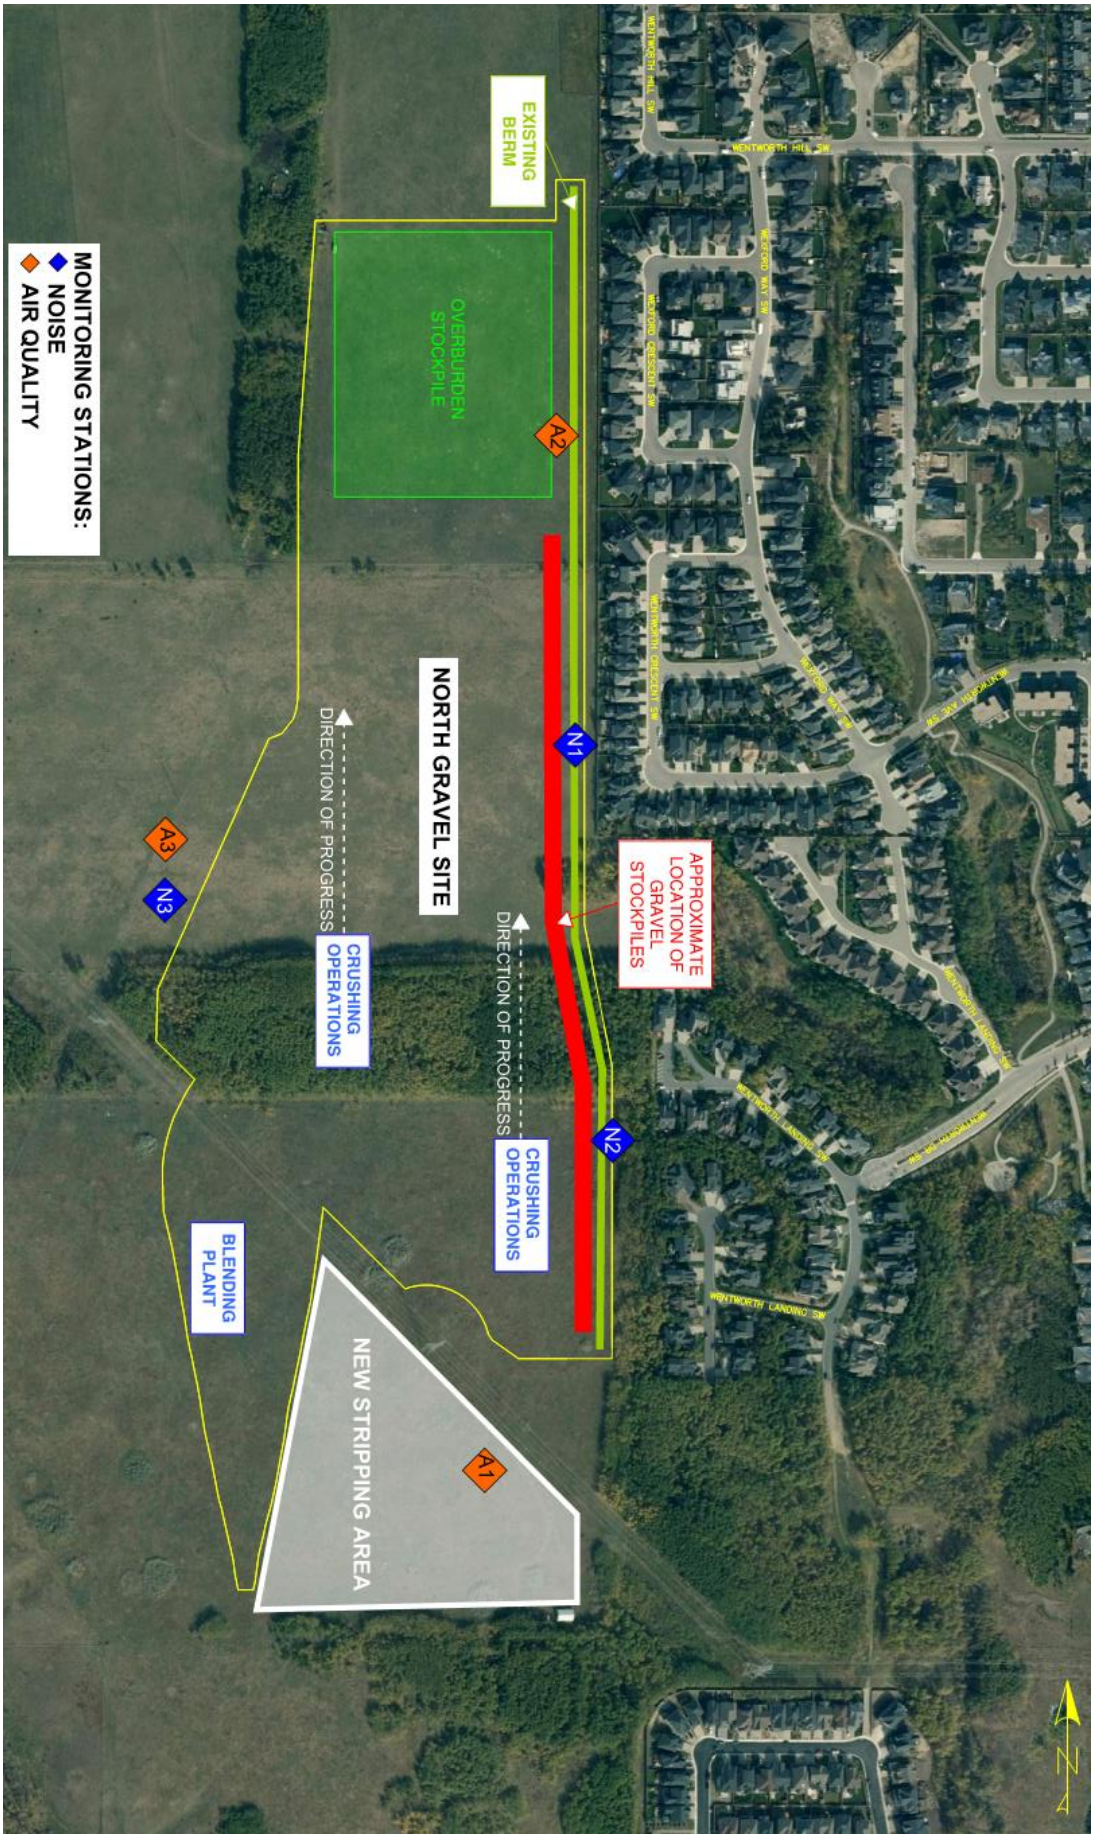

Completion Date: October 13, 2017

Hours of Work: Monday to Friday from 8:00 a.m. to 8:00 p.m. and Saturdays and holidays from 9:00 a.m. to 8:00 p.m.

KGL would like to thank you for your patience during this period of construction.
