

# Southwest Calgary Ring Road

## Construction Advisory

April 1, 2019

### Drilling Piling along Southwest Calgary

**Activity and Location:** KGL Constructors will be drilling and pouring a series of piles along the Southwest Calgary Ring Road corridor from approximately 90 Avenue S.W. to Highway 22X. This activity will take place in the Transportation Utility Corridor near the communities of Cedarbrae, Woodbine, Evergreen and Bridlewood.

Site impacts and mitigation measures will include:

- A drilling rig and other support equipment working in and around the sites
- An increase in noise and vibration during working hours
- Equipment entering and exiting roadways
- Dust monitoring and mitigation
- Site lighting oriented away from residences
- Drilling will typically take place Monday through Saturday from 7:00 a.m. to 7:00 p.m. (within the construction hours for the SWCRR)

The piles, consisting of rebar and concrete, will serve as bases for future guideposts and directional signs on the Southwest Calgary Ring Road. Each location is expected to take several days to complete. Additional drilled piles are planned for the area as construction progresses and further sites become available.

**Scheduled Start Date:** Week of April 1, 2019

**Scheduled Completion Date:** Periodic activity into summer 2019

**SWCRR Construction Hours:** Monday to Saturday from 7:00 a.m. to 10:00 p.m. and Sundays and holidays from 9:00 a.m. to 10:00 p.m.

KGL would like to thank you for your patience during this period of construction.
